

## NEWS Press Release

### FDA OK's WellnessPro® Electrotherapy Device!

#### Electromedical Technologies Announces FDA Clearance of WellnessPro®

---

**P**hoenix, Arizona. **July 7, 2007** - Designed for relief of pain such as any chronic, intractable and post surgical, post traumatic pain, the WellnessPro® Transcutaneous Electrical Nerve Stimulation device is specifically made for Pain management even in the most difficult cases. The device includes 1000 available Auto Code treatment programs, 1 million frequencies, option to fully program any frequencies, option to fully program any preset codes, 5 wave modalities and many other features that ensure patients receive appropriate electrotherapy treatment specific to their condition and treatment site. This new generation electrotherapy device also includes Deep Pulse®, a unique technology which delivers optimal pain relief via use of endorphin release and gate control pathways.

Today the U.S. Food and Drug Administration (FDA) announced that it has granted clearance to market the WellnessPro® Transcutaneous Electrical Nerve Stimulation device.

“Our goal is to help improve the health and welfare of people around the world, by always being on the cutting edge of biomedical technology in the research, design, manufacture, and sale of instruments that alleviate pain, restore health, and extend life”, said Matthew Wolfson, CEO Electromedical Technologies.

Electromedical Technologies has emerged as a global market leader in non-invasive, non-systemic pain management and physical rehabilitation.

The WellnessPro® device is designed specifically for the relief of Pain such as any chronic, arthritic, and postsurgical pain. The portable device can be used at home or on-the-go, and integrates site specific, preset treatment programs that make it convenient and easy-to-use. This feature ensures that the patient receives the appropriate electrotherapy treatment, specific to their condition and treatment site.

Electromedical's Senior Technology Director Dr. Jacob Kaufmann said, “The WellnessPro® product is the first of Cutting Edge new generation of electrotherapy devices that cannot be compared to any predecessor devices. WellnessPro® has the Largest Frequency Range available, yet is so easy to use, that we believe patients will achieve faster results and more predictable pain relief than anything on the market today. We believe that healthcare providers will take great comfort in knowing that their patients are getting the most advanced and appropriate electrotherapy treatment for their specific conditions.”

Electromedical, would like to thank our team of scientists, doctors and researchers from the United States and Europewho contributed to creating the WellnessPro® 2010, combining research from past electro medical pioneers withnew breakthrough technologies in this field, allowing many thousands of people to achieve what is most important - Incredible Results!

**The WellnessPro device is now available and has been released for distribution.**
